- » Fully compatible IE7 +, Firefox 2 +, Firefox 3, Flock 0.7 +, Netscape, Safari, Opera 9.5, Chrome.
- » Delivered with source Adobe .PSD files.
- » Delivered with "QuickStart Package".

## CAR MAGAZINE - Overview files

After downloaded all the files available on our exclusive MemberShip commercial section and also some files that are available on our free tools section, let's see a brief overview inside the CAR MAGAZINE package release. Since some tools used on this template have their own HelpFile, we will give you here the major orientation guide to make your installation. For further details about our tools, please read the respective HelpFiles available on this package or on our free tools download section.

So, here's a brief overview of the files available inside the "CAR MAGAZINE" Template pack release.

You downloaded the following 2 compressed files:

» **gk\_car\_magazine\_J!15.tgz** - This is the template file installation.

» **gk\_car\_magazine\_J!15\_rest\_files.zip** "Before running... please unpack the .zip pack file."

After unpack, the "gk\_car\_magazine\_J!15\_rest\_files" folder contains the following files:

» **\_doc!!!** "folder"

Here's the present Instructions Manual, the PhotoSlide GK2 Component, Tabs Manager GK3 Component and also the News Show Pro GK1 module HelpFiles. You can also find this Manuals inside the respective package tools.

» **\_quickstart!!!** "folder"

The CAR MAGAZINE comes along with a QuickStart package version installation.

» **Components** "folder"

Contains instruction to download the necessary tools (components and modules) that are necessary to use on the Car Magazine template. Since this tools are free and have their own HelpFile, please download the respective package of each one, from our free download section.

» **Modules** "folder"

Gavick Embed Media module (*GK\_Embed\_Media\_1.0.zip*) - This module displays external media players like for example Youtube, Vimeo and all others that provide public their embed source code (**Installation: use the Joomla Installer**). This module is not used on the demo, but you might used it.

» **Source** "folder"

The source psd. format files for Photoshop Graphic Editor, that you can use for complete customization of your website design.

**Blue** "style folder"

all\_layers\_with\_all\_slices.psd - backgrounds.psd - interface\_elements.psd - logo.psd

**Orange** "style folder"

all\_layers\_with\_all\_slices.psd - backgrounds.psd - interface\_elements.psd - logo.psd

Notice!! The font type used on the source files are not provided with the Template package, because they may have copyrights reserved.

## IMPORTANT!!!

### Other files necessary and not available on package.

Like explain before, to complete the necessary files, you must download from our free tools section the following files (go to <http://tools.gavick.com> or to <http://www.gavick.com/downloads-area/>):

#### » PhotoSlide GK2 component package (Unpack first!).

There you will find the component and also the following new files for this template (they are located here, because it will be available for free download).

GK News Image I module (*mod\_news\_image\_1.zip*) - this is the upgrade version module for slide news show for the photoslide component (Installation: use the Joomla Installer).

GK News Image I plugin (*plg\_gk\_news\_image\_1.zip*) - this is the necessary plugin to be installed on the PhotoSlide GK2 component, allowing the creation of groups for displayment on the module (Installation: use the Component Installer).

#### » Tabs Manager GK3 component package (Unpack first!)

Here you can find this following files needed.

GK Tabs Manager GK3 component (*com\_gk3\_tabs\_manager.zip*) - this is the component file (Installation: use the Joomla Installer).

GK Tabs GK1 module (*mod\_gk\_tab.zip*) - this is the module to front end display of articles (Installation: use the Joomla Installer).

#### » News Show Pro GK1 module package (Unpack first!)

Here you can find this following files needed.

GK News Show Pro GK1 module (*mod\_news\_pro\_gk1.zip*) - this is the module (Installation: use the Joomla Installer).

GK News Show Pro GK1 plugin for PhotoSlide GK2 (*plg\_news\_pro\_gk1.zip*) - this is the necessary plugin to be installed on the PhotoSlide GK2 component, allowing the creation of groups for displayment on the News Show Pro GK1 module (Installation: use the Component Installer).

After you get this files, please unpack first and use them when needed, as we explain in next chapters.

Here are some recommendations that you should considerate and might help you.

**Are you new in Joomla?** If you are new in Joomla, we strongly recommend that you perform some tests and experiences to fit into this excellent CMS (Content Management System) and visit the official support forum of [www.joomla.org](http://www.joomla.org) for any problem directly related. Nevertheless, we will be happy to help you if possible in our support forum.

**Building a new Joomla Website ?** If you are building a new website and if you like our demo, we strongly recommend you to use the QuickStart version and from there, change it to your own content and configuration.

**Get quick acquainted with CAR MAGAZINE !** In all cases, if you are a new or already experienced user, we recommend that you install an experimental version, using free popular local server like **XAMPP** or **WAMP** (you can find easily information on internet about these excellent tools for website development) or if you wish, an online test installation. This way, you will be able to fit in more fast and easier way in some configuration tools, modules positions and other particular details that you need to know.

**You already have a website and want to use this template ?** If you choose to install this template in an already existing website, make sure that you have the latest version of Joomla (present version - J!1.5.10). If not, please upgrade to insure total compatibility with our template and tools. Naturally, if this is your case, you must install all files individually, from template to components, modules and plugins. Nevertheless, please remember that the QuickStart version still is an important ally to help you. Just remember the previous recommendations.

**Do you have some problems with our tools ?** Some usual problems reported on our support forum are originated from script conflict with 3rd party tools. If you know Joomla sufficiently enough, you already know that there is a huge amount of solutions and extensions available for free or some commercial from other team or developers. Naturally, you will search for others extension to complete some particular functionality and your website needs, but understand that we are responsible only for our template and tools; and we cannot guarantee that all 3rd party extensions will work perfectly with our template or tools. So, it is your hands and it is your responsibility to choose those extensions on Joomla Community. Anyway, you always can ask for support in our forum and if possible, we will try to help you.

Another usual problem reported in our forum, is related with permissions on files and directory. Some tools need that some specific files are set with rewrite or read permissions, so you can find some problems if you don't have these permissions set. Take note that we cannot control your server security configuration, but we can point you directions where you must change these permissions. If you are unable to change it, we recommend that you contact your host server provider.

**Keep always updated!** We strongly recommend that you visit us regularly on [update.gavick.com](http://update.gavick.com), where you can see the latest updates of our templates, components, plugins and modules. If you have any problem, be sure the solution is not already available and you will avoid waste time searching or asking for solutions in our forum support.

**Need some small CSS style customizations adjustments?** You can always request some support from our Moderators or Developers, but you need to take in mind that this is customization and not regular support service. We are considering in the future to create personal customization and installation services support for those who need it. The Developer Membership is excluded, since this service is already available for this subscription. Nevertheless, we will always be available to try to help you.

If you have some experience in CSS styling, we strongly recommend the use of the most powerful tool for WebDesigners, available for free in Firefox browser - The **FireBug** addon - a perfect ally and work tool.

**What is the better way for me to place a problem in the support forum?** If you need help in some issue, please post it in our forum support in the most objective way, preference in English language and with an URL to show us the problem. This way, we will be able to give you the needed help in faster way.

**Need to contact Us?** Besides our official forum support, you can also contact us by Skype. Please check our contact page and we will reply to you as soon as possible.

## CAR MAGAZINE QuickStart installation

Why do we recommend this installation option? Well, because it's the easiest way to install our template and to take advanced immediatly of all components, plugins and modules configurations. It's like a normal Joomla!1.5 installation and it includes all files needed. It will set your joomla website exactly as we show the **CAR MAGAZINE** Template in our [demo.gavick.com](http://demo.gavick.com).

Again, we invite you to visit us regularly, because all Joomla!1.5 future upgrades may force us to upgrade all our template and the respetive tools. So, keep in touch on [update.gavick.com](http://update.gavick.com).

### Sugestion!!!

You can easily get acquaint of the CAR MAGAZINE template environment, by making some local tests, using a local server like (i.e. XAMPP or WAMP Servers) or others available for free in the internet. By installing this local servers, you be able to install, run and test easily all the potencial of this template without any problems. This make all the difference and we guarantee you that will avoid wasting time by searching our support forum, when the answer is already available on the QuickStart version.

Well, let's do it! If you follow this unique basic steps, your should not have any problems at all with the QuickStart installation.

### Installation Steps for the QuickStart!!! version :

**Step 1)** Unpack the compressed file QUICKSTART\_MAR2009.zip inside of the \_quickstart!!! folder and upload all the content inside of the QUICKSTART\_MAR2009 folder to your clean website directory. You will notice that this files are similar to a normal Joomla!1.5 package. That's because it's like a normal joomla installation.

**Step 2)** Create a new database using MyphpAdmin that you should have it installed in your cpanel website.

**Step 3)** Make a normal Joomla J!1.5 installation steps using the upload files. **Notice!!! You will see that it's no necessary at this time to set your Username and Password, because they are already set.**

**Step 4)** Like a normal joomla installation, you must delete or rename your "installation" folder in your new website installation.

**Step 5)** After ending the installation, enter in the Administrator using Username "admin" and password "demo" *(Naturally, you can change this values after!!!).*

That's it! Easy, was not? Of course it was.

If you go to your new Joomla Installation frontpage, you will see exactly as our demo. Now, you can start working on your own content and make guidance use of our tools configuration.

## CAR MAGAZINE Quick Guide Step by Step Installation

For those who need to install the template manually and do not need further details information, we prepare the following short cut step by step task list for the CAR MAGAZINE installation.

- » **Step 1** - Install the **CAR MAGAZINE** template (*gk\_car\_magazine\_J!15.tgz*) using the Joomla Installer.
- » **Step 2** - Go to the Templates Manager and set the “**gk\_car\_magazine**” template to default one.
- » **Step 3** - Using the Joomla Installer, install the **PhotoSlide Gk2** (*com\_gk2\_photoslide.zip*) component.
- » **Step 4** - Go to the PhotoSlide GK2 administration (**do not use the joomla installer!!!**), select “plugins” menu and install the Gk News Image I plugin (*plg\_gk\_news\_image\_1.zip*) and the **News Show Pro GK1** plugin (*plg\_news\_pro\_gk1.zip*). **Don't forget to enable this plugins!!!** You now can start working, if you wish, creating your slide groups on the PhotoSlide GK2 administration.
- » **Step 5** (Optional) - Go to the PhotoSlide GK2 administration, select “Extensions” menu and install the **Rainbow Extension** tool (*ext\_rainbow.zip*) and the **EasyLinks Extension** (*ext\_easylinks.zip*). Don't forget to enable this extension, if you want to use it.
- » **Step 6** - Go the Joomla Installer! and install the **Gk News Image I** module (*mod\_gk\_news\_image\_1.zip*).
- » **Step 7** - Using the Joomla Installer, install the **Tabs Manager GK3** (*com\_gk3\_tabs\_manager.zip*) component.
- » **Step 8** -Using the Joomla Installer, install the **Tabs GK1 module** module (*mod\_gk\_tab.zip*).
- » **Step 9** - (Optional) Using the Joomla Installer, install the **Gk Embed Media** module (*GK\_Embed\_Media\_1.0.zip*).
- » **Step 10** - Using the Joomla Installer, install the **News Show Pro GK1** module (*mod\_news\_pro\_gk1.zip*).
- » **Step 11** - With all previous 9 steps done, your template have all the necessary files installed. If you need some orientation of the demo modules positions, please see the screenshot on the next page!

## Demo Modules Positions

The following screenshot contains a resume list of the modules used on the demo template and the respective positions. For each modules configuration, we recommend that you make an experimental installation locally or online, using our quickstart version:

## Demo Modules Configurations

For your orientation, please check inside the DemoModulesConfigurations folder and you will find some screenshot of the Gavick Tools modules configurations used on this template. This might help those who don't use the QuickStart version installation.

## CAR MAGAZINE template installation

Navigate to your Joomla! Administrator and enter in the administrative panel on your Joomla site.

From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the template file ( [gk\\_car\\_magazine\\_J!1.5.tgz](#) ) and press 'Upload File & Install.'

A message will appear saying 'Upload template - Success.'

This page will display an overview of the template, then select 'Continue...'

**Install Template Success**

### Car magazine

*When it comes to wide concept of top showcasing...*

with elegance, exotic and technical magazine covering, all the small details will make the difference.

Check out what's behind the new GavickPro Car Magazine Template, with special addition of most powerfull and suitable tools in Joomla, that will provide you the opportunity to shine among the most prestigious show's in the world.

We all need some inspiration for business presentations and still, most of the times, it's not enough. Worry no more, because Car Magazine will show you what is all about.

When you thought nothing would impress even more... you thought wrong!

An overview of key features of this template is as follow:

- Tableless design and 100% css based.
- 2 colors style themes variations (blue-orange).
- Build support for PhotoSlide GK2 component and the new Gk News Image I module version.
- Build support for the new News Show Pro GK1 module (with respective plugin to work with along with PhotoSlide GK2).
- Build support for the new Tabs Manager GK3 component and special design layout for Tabs Arts module.
- Disable option for main body appearance on front page.
- Header position width setting option.
- Column position modules (left or right side) and width setting options.
- Show/Hide mainbody on frontpage option.
- Slider for banner2 position option.
- Default status for banner2 position option.
- Login and Register buttons frontpage display options.
- Style Switcher option.
- Compressed engine option for each modules.
- Support for language translation.
- 2 layout options: 2 columns (right or left + component) and 1 column (component).
- All 20 modules are fully collapsible and more 20 modules positions ready for tabs.
- Impressive built-in content style.
- New Gavick Suckerfish menu version. 34 different styles moomenu animation effects and now, with first child level with horizontal style.
- Speed menu animation option
- Optional IE6 Warning / Upgrade Notification
- Lightweight, modern and very fast-loading design
- Joomla 1.5 Native
- W3C XHTML 1.0 Transitional. W3C CSS Valid
- Fully compatible IE7+, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
- Delivered with source Adobe .PSD files.
- Delivered with "QuickStart Package".

[View Car magazine in live demo](#)

After the template is sucessful installed, you must set it as your default template. To do that, navigate to [Extensions](#) > [Template Manager](#) and set it as your default joomla template.

With the template installed, next we are going to explain how to install the others files needed (components, modules and plugins).

## PhotoSlide GK2 Component Installation

The PhotoSlide GK2 is the most advanced and free News Slide Image component available for Joomla!1.5. For further detail information, please read the PhotoSlide GK2 HelpFile provided in the \_doc! folder package.

You need to download this package from our free tools download section on [www.gavick.com](http://www.gavick.com) and then unpack first this fiile.

Using the Joomla Installer, search for the com\_gk2\_photoslide.zip and select "upload and install"

A message will appear saying 'Upload Component - Success" and it will show you an overview of the template. Then select "Continue"...

## Gk News Image I Plugin Installation

As you can notice on the PhotoSlide GK2 Helpfile, every module design for this component, needs to have first installed the respective plugin, that will interact between the component and module.

The process installation of the plugin is exactly the same as stated on the HelpFile.

### Notice!!!

Please, do not use the Joomla Installer to install this plugin. You need to use the PhotoSlide component administrator do install any plugin or extension available.

So, navigate to the PhotoSlide GK2 administration, select "plugins" option and choose "Install Plugin". Then search the plg\_gk\_news\_image\_1.zip file locally and click "Save" on right menu.

If all goes well, you should be able to see the plugin sucessful installed, like the following screenshot indicates.

Groups   <b>Plugins</b>   Extensions   Check system   Help   Info   GavickPro News							
Plugin has been installed successfully							
#	ID	Status	Name	Description	Type	Version	
1	1	<input checked="" type="checkbox"/>	GK News Image VI	XML file for module Gavick News Image VI	module	1.0	
Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules							

The next step is to select the plugin, by enable the check box and on the right menu, click on "Enable Plugin".

The next step is to select the plugin, by enable the check box and on the right menu, click on “Enable Plugin”.

**Photoslide GK2 - Plugins**

Back Install plugin Enable Plugin Disable plugin Delete Help

Groups **Plugins** Extensions Check system Help Info GavickPro News

Selected plugins has been enabled

#	ID	Status	Name	Description	Type	Version
1	1	<input checked="" type="checkbox"/>	GK News Image VI	XML file for module Gavick News Image VI	module	1.0

Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules

The plugin is now enable on the PhotoSlide GK2 and you can start creating your own groups.

## Add Groups in PhotoSlide GK2 configuration

Since we already have the plugin installed, let's see how to create a group on the PhotoSlide GK2.

The process is the same as stated on the PhotoSlide GK2 HelpFile, but as you already may know, each groups for different modules types have their own parameters to set. The Gk News Image I is no exception to this rule. So, select the “Groups” option and click on “Add Group” option. As we only have one plugin installed, this will be assume by default on the group creating process.

Here are the necessary parameters to set.

**Photoslide GK2 - Add group**

Back Save Close Help

Groups **Plugins** Extensions Check system Help Info GavickPro News

You have only one enabled plugin so this plugin was automatically selected for this new group

Group name:	<input type="text"/>
Images quality (0-100):	75 %
Image width:	<input type="text"/> px
Image height:	<input type="text"/> px
Thumbnail width:	<input type="text"/> px
Thumbnail height:	<input type="text"/> px
Background color:	#000000
Title color:	#FFFFFF
Text color:	#AAAAAA
Link color:	#CCCCCC
Hover link color:	#EEEEEE

### Group name:

For identification of the group, that will be necessary on the module configuration.

### Image quality (0-100):

If there's a group with a big number of slides to be display, you can avoid most possible, long time loading page. So, we can use this option to increase speed loading of the module, by decreasing the image quality percentage to maximum, without cross over the fair quality needed, of course.

### Image width and height:

Set image width and height in pixels.

### Thumbnails width and height:

Set thumbnails width and height in pixels.

### Background color:

Color value in hex format for background (i.e. #FFFFFF).

### Title color:

Color value in hex format for Title (i.e. #FFFFFF).

### Text color:

Color value in hex format for text (i.e. #FFFFFF).

### Link Color:

Color value in hex format for Link text (i.e. #CCCCCC).

### Hover Link color:

Color value in hex format for Hover Link user event effect (i.e. #000000).

The following screenshot is from the Demo Header Group used on the Car Magazine demo Template and it show the configurations used.

Groups   Plugins   Extensions   Check system   Help   Info   GavickPro News	
Group name:	Demo Header
Images quality (0-100):	75 %
Image width:	530 px
Image height:	290 px
Thumbnail width:	32 px
Thumbnail height:	32 px
Background color:	#ffff
Title color:	#ffff
Text color:	#ffff
Link color:	#ffff
Hover link color:	#ffff

After all parameters are set, save it and the group is ready to receive slides.

## Adding Slides to Group configuration

Let us now see how to add slides to the group.

First, open the "Groups" panel on the Photoslide GK2 administration, click on the group create and you will enter on the group slides content panel. As you can see, there's no slides created, so we will just to fix this, by pressing the "Add slide" button and set the following parameters.

**Photoslide GK2 - Add slide**

[Groups](#) | [Plugins](#) | [Extensions](#) | [Check system](#) | [Help](#) | [Info](#) | [GavickPro News](#)

Name:

Image:  [Procurar...](#)

Access level: Public

Title:

Text:

Link type: Article link

Link value:

Article: Example Pages and Menu Links

Wordcount:

Image stretch: Don't stretch image

### Name:

Set the name of the slide.

### Image:

Select the source image slide for uploading purpose.

### Access level:

Set level access for image display (public, registered or special).

### Title:

Set news title for module displayment.

### Text:

The text of the slide to be show on the module display (*if you choose bellow your own title and text display*).

### Link type:

Set if you want your own link or the link of an existent article.

### Link value:

If you choose previously your own link type, set it here or leave it blank if you didn't (ex. <http://mylink.com>).

### Article:

If you choose an article link, set it here or leave the "Your own title and text" set.

### Word Count:

Set the number of words to be display on the slide from the article or from your text.

### Image stretch:

If you have an image smaller or bigger from the module display option, choose "Stretch image" and this will automatically reset the image dimensions to fill totally the module. This option may withdraw some quality image if the same have some dimension not proportional from the module. If you have a image with same dimension set on the module, set it "Don't stretch image" option.

Tip: You can click button "Settings" to show setting of selected slide

Screenshot of the group created for the demo template.

After all slides are set on the group, you can see the general content and making use the AJAX setting preview option, you can easily preview all parameters of each slide and also preview the image for purpose display.

## News Image I module installation

Using the **Joomla Installer**, from the top menu select **Extensions > Install/Uninstall**. Click the 'browse' button, select the News Image I module file (*mod\_gk\_news\_image\_1.zip*) and press 'Upload File & Install.'

A message will appear saying 'Install Module Success.' them select "Continue..."

## News Image I module configuration

After successful module installation, from the top menu, go to **Extensions > Modules Manage** and enter in panel configuration of the module. Set the module in the header position and enable it. Before you save it, you must configure the following parameters fields.

### Module parameters:

#### Module Class Suffix:

A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling

#### Module unique ID:

Unique ID for module (must be unique if you have two or more modules on one page) (i.e. newsimage1).

#### Slides group:

Group with slides (*if list is blank then it means that you must add at least one group in Photoslide GK2*).

#### Module width:

If you want to set other width than value setted in Photoslide (i.e. 640). In other situation leave 0.

#### Module height:

If you want to set other height than value setted in Photoslide (i.e. 480). In other situation leave 0.

#### Module wrapper border:

Border width for module wrapper in px (i.e. 1).

#### Module wrapper border color:

Hex value of color for module wrapper border (i.e. #000).

#### Slide position (left):

Set left image slide positioning (i.e. 10).

#### Slide position (top):

Set top image slide positioning (i.e. 10).

#### Show text block:

Enable this option if you want show article content linked with slides.

#### Text block width:

Text block width (i.e. 200).

#### Text block left margin:

Left margin for text block (i.e. 50).

#### Text block opacity:

Opacity of text block - must be float between 0 and 1 or integer - 0,1 (i.e. 0.45).

Screenshot of the module parameters set for the demo template.

### Text block background:

You can select default background from group settings or your own value.

### Text block background color:

If you select in previous option your own value - this value must be in hex format (i.e. #000000).

### Text block orientation:

Select text block - orientation - horizontal or vertical.

### Text block height:

Text block height for horizontal orientation.

### Clean XHTML:

You can clean your articles from any formatting.

### Readmore button:

If you want to show readmore button.

### Left interface:

Left interface for tick list and readmore button.

### Left interface width:

Left interface width (i.e. 32).

### Additional readmore:

Readmore button visible in left interface (if left interface is enabled).

### Readmore button text:

Text for readmore button (i.e. Read more).

### Title as link:

You can enable link in header of article in text block.

### Previous button:

Turn on prev button.

### Next button:

Turn on next button.

### Play/pause button:

Turn on play/pause button.

### Buttons margin right:

Set margin between interface buttons and module right side (i.e. 20)

**Parameters**

**Module Parameters**

Module Class Suffix	_clear

**Advanced Parameters**

### Buttons margin bottom:

Set margin between interface buttons and module bottom side (i.e. 20).

### Slide as links:

Turn on click events for slides.

### Thumbnail bar:

Turn on thumbnail bar.

### Thumbnail images margin:

Set margin for thumbnails in thumbnail bar (i.e. 1).

### Thumbnail images border-width:

Border width for thumbnails (i.e. 1).

### Thumbnail images border-color (inactive):

Border color for thumbnails when you click on other thumb in thumbnail bar (in hex format) (i.e. #000000).

### Thumbnail images border-color:

Border color for thumbnails when you click it on thumbnail bar (in hex format) (i.e. #000000).

### Thumbnail bar position:

Position of thumbnail bar - over or under text in text block.

### Tick list:

Turn on tick list.

### Ticks margin left:

Set margin between ticks buttons and module left side (i.e. 20).

### Ticks margin top:

Set margin between ticks buttons and module top side (i.e. 20).

### Preloading:

Turn on preloading.

### Slide animation speed:

Speed for animation effect in ms (i.e. 1000).

### Animation interval:

Interval between slides in ms (i.e. 5000).

### Autoanimation:

Enable if you want to start animation automatically.

### Slide animation type:

Slide animation effect for the module.

### Text animation type:

If you want to enable effect for text.

## Module advanced parameters:

The screenshot shows a web interface for configuring module parameters. It has a title 'Parameters' and two expandable sections: 'Module Parameters' and 'Advanced Parameters'. The 'Advanced Parameters' section is currently expanded, revealing four configuration options, each with a label and a dropdown menu:

- Clean template code:** The dropdown is set to 'Enabled'.
- Use MooTools:** The dropdown is set to 'Automatic'.
- Use script:** The dropdown is set to 'Automatic'.
- Use compressed engine:** The dropdown is set to 'Enabled'.

### Clean template code:

Now modules support new technique of assets JavaScripts files. If you want to get rid all configuration scripts to imported scripts then enable this option. Value disabled means that configuration scripts will be placed in template code (old method).

### Use Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site, then disable this option also.

### Use script:

In normal situations, option "automatic" is strongly recommended. Use this option only if you have a problem with scripts on your site. If you want to run more than one copy of this module on same page, then set this value for disabled.

### Use compressed engine:

To minimise file size you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option). Additionally - when you use more than one copy of this module per one page, then you must set this same value of this option for all instances of module.

## News Show Pro GK1 Module

News Pro GK1 module is a derivative version from the original News Show GK3 module that will offer you new and hugeness options for news articles displayment on front end page. Like said previously, this tool will be also available for free download soon and it will be available an specific HelpFile.

To avoid duplicate instructions for the News Show Pro GK1 module, please check the respective HelpFile of this tool, available on \_doc! folder package or download it from our free section Joomla!1.5 Tools.

## News Show Pro GK1 Module Instalation

On your Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select Extensions > Install/Uninstall.

Click the 'browse' button, select the module file inside the Modules folder (*mod\_news\_pro\_gk1.zip*) and press 'Upload File & Install.' A message will appear saying 'Upload Module - Success.'

This page will display an overview of the module, then select 'Continue...'

## News Show Pro GK1 Module Configuration

In the demo template configuration, we use several News Show Pro GK1 modules, each one with respective unique ID's. For detail information of the parameters used on this module, please read the respective HelpFile.

If you use the QuickStart version of this template, you can see the respective configurations of each module.

## News Show Pro GK1 Using Plugin with the module

The News Show Pro GK1 brings along a special plugin to be installed using the PhotoSlide GK2 component. This plugin allows you to create specific image groups to be displayed on the News Show Pro GK1 module.

For detail information about this plugin and how to use it, please read the respective HelpFile that comes along with this module package files.

### Some considerations for Image display using the plugin for the PhotoSlide:

- » By enable plugin support in the module and if you want to display the images and sizes configurations setted on PhotoSlide group, then you must leave the "width" and "height" fields in the module with "0" value. If you set on this fields different values from "0", then the image size will be display and it's source will be from image articles and NOT from images setted on PhotoSlide GK2 group.
- » Also, when you enable the plugin support, with the respective list of news configurated to be display on the module, some mixed with those from the group, if you leave width and height "0" values, the ones not selected on PhotoSlide will display the first image of the article with default image size.
- » The plugin creates the possibilty to use different image dimensions in each image connected to articles.

### "- So Why should I use the News Show Pro Plugin ?"

- » The plugin can be essential to optimize the cache loading time of your internet page, in case you need to use large amount of module and number of article with image display. Basically, we mean that by default the News Show Pro will display a resized image from joomla content and not create (for know) real thumbnails with smaller weight. By using this tool, you can display a different and smaller image by creating a specific group on PhotoSlide GK2 with each image related to respective article. So, with this tool you will be able to speed up you page loading and also, gives you another important tool to stylish differently your front end articles announcements. In CAR MAGAZINE demo template, we use (and abuse) this option so we could show less cache loading.

## Tabs Manager GK3 Component

The Tabs manager GK3 is a special component that allows you to create groups of tabs to be displayed on the respective Tabs GK1 module, with articles, modules or XHTML custom content.

Again, to avoid duplicating information, please read the Tabs Manager GK3 Component HelpFile, that is provided in the respective tool package, for further instructions.

For specific demo modules configurations, please view the images inside of the “configurations” folder.

## Tabs Manager GK3 Component Installation

On your Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the ‘browse’ button, select the component file inside the “tabsmanager\_3\_pack/component” folder (*com\_gk3\_tabs\_manager.zip*) and press ‘Upload File & Install.’ A message will appear saying ‘Upload Component - Success.’

This page will display an overview of the module, then select ‘Continue...’

## Tabs GK1 Module Installation

Again, from the Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the ‘browse’ button, select the module file inside the “tabsmanager\_3\_pack/module” folder (*mod\_gk\_tab.zip*) and press ‘Upload File & Install.’ A message will appear saying ‘Upload Module - Success.’

This page will display an overview of the module, then select ‘Continue...’

## CAR MAGAZINE parameters configuration

You can change in template parameters by selecting the gk\_car\_magazine template on Template Manager. Navigate to “Extensions > Template Manager” and search for the CAR MAGAZINE template.

Press “edit” option and you be able to see the following parameters table.

### Basic template parameters:

#### Template color:

Select default template color (blue or orange).

#### Header position width:

Set width for header position in pixels (i.e. 732)

#### Column position width:

Set width for header position in pixels (i.e. 312)

#### Column position:

Set column left or right position.

#### Show mainbody on frontpage:

Enable/disable the mainbody on frontage.

### Interface parameters:

#### IE6 alert:

Show information when user use IE6.

#### Slide for banner2 position:

Enable this option if you want to slide animation effect for banner2 module position.

#### Default status for banner2 position:

If you want to display banner2 position module.

#### Login button:

Enable login button on frontpage with modalbox display.

#### Register button:

Enable register button on frontpage with modalbox display.

#### Logo as image:

If you want to have normal image instead of link with background - enable this option. **IMPORTANT:** when you enable this option, style change won't change your logo till page refresh.

#### Style switcher:

Enable this option if you want to enable style switcher.

**Parameters**

The parameter file \templates\gk\_car\_magazine\params.ini is **writable!**

Basic template parameters	
Template color	Blue
Header position width	570
Column position width	312
Column position	Right
Show mainbody on frontpage	Disabled
Interface parameters	
IE6 alert	Enabled
Slider for banner2 position	Enabled
Default status for banner2 position	Invisible
Login button	Enabled
Register button	Enabled
Scalable font size	Enabled
Logo as image	Enabled
Style switcher	Enabled
Menu parameters	
Menu type	MooMenu
Menu name	mainmenu
Menu speed	180
Menu animation	linear
Menu width animation	Enabled
Menu height animation	Enabled
Menu opacity animation	Enabled

### Menu parameters:

#### Menu type:

Select the main menu type to by use on the frontpage.

#### Menu name:

Identify the ID of the menu for display.

#### Menu speed:

Set speed menu animation.

#### Menu animation:

Set type of menu animation transition effect.

#### Menu width animation:

Use animation width in menu.

#### Menu height animation:

Use animation height in menu.

#### Menu opacity animation:

Enable/disable the use of opacity animation in menu.

# 12 Modules Positions

CAR MAGAZINE template supports full width configurations for use with galleries or forums, make sure you do not publish any modules in right and the 'component' will fill the entire width.

# 15 Modules Variations

## Modules Template Variations

In CAR MAGAZINE template we provide 5 modules variations and **no head** prefix module adjustment.

### Default

If you don't set any prefix, the module will display like the right screenshot.

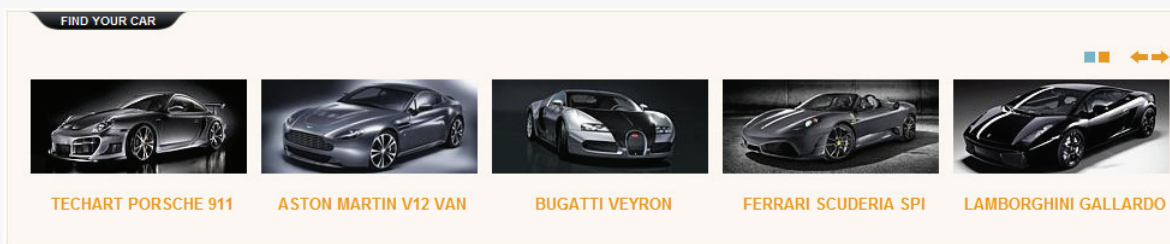

### \_clear

If you set “\_clear” prefix, the module will display like the right screenshot.

### \_color

If you set “\_color” prefix, the module will display like the following screenshot.

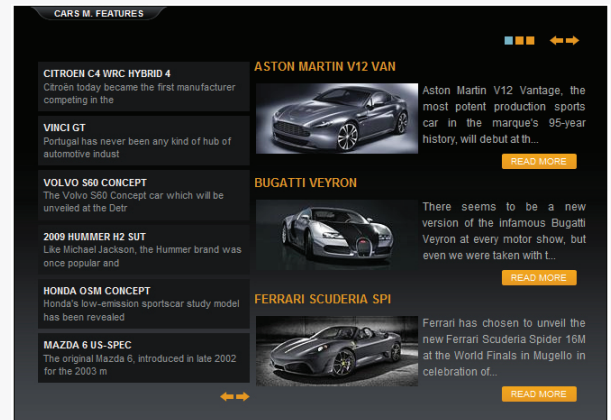

### \_text

If you set “\_text” prefix, the module will display like the right screenshot.

JoomlaCode  
JoomlaCode, development and distribution made  
easy.

## **\_dark**

If you set “**\_dark**” prefix, the module will display like the right screenshot.

## **\_advert**

If you set “**\_advert**” prefix, the module will display like the right screenshot.

## **nohead**

This prefix is added after the main prefix set on the Module. It might be very useful, if you set in line, several modules of same type and for style purpose, you need only to show the module title on the first one. So, look at the following screenshot and see the respective prefix added, just like we used on the demo template.

User 7 module

Prefix “**\_color**” prefix

User 8 module

Prefix “**\_color nohead**” prefix

User 9 module

Prefix “**\_color nohead**” prefix
