Finally a place where all my friends are readily accessible to my own liking: My Own Social Community Network as I want it to be!

With Gavick Special Touch, the featured template this month is exclusively dedicated to the powerful and popular Joomla! extension - JomSocial from Azrul team.

This is your opportunity to turn your online community interface into an elegantly JomSocial-integrated and superiorly designed website from the GavickPro Design Team.

With the new Elvesocial template, your friends and community members will enjoy every single moment of sharing messages and experiences online in a revolutionary digital design: Elvesocial.

An overview of key features of this template is as follow:

- » Tableless design and 100% css based.
- » Build support for JomSocial from Team Azrul.com – Joomla Social Network Component. **[NEW]**
- » Build support for TabsManager GK3 component for tabs content display with exclusive template design.
- » Build support for the News Show Pro GK1 module (now with new features added, with special novelty of automatic creation of thumbnails). **[NEW]**
- » Disable option for main body appearance on front page.
- » Option of module as component by setting module on main body position.
- » Option of Column position to left or right display.
- » Configurable Column position width.
- » Configurable Header1 position width.
- » Login and Register buttons options with modalbox effect display.
- » Easy footer content configuration on template parameters.
- » Build support for WYSIWYG Friendly GK Typography editor plugin.
- » Compressed engine option for each modules.
- » Support for language translation.
- » 2 layout options: 2 columns (component + right) and 1 column (component).
- » All 19 modules are fully collapsible and more 20 modules positions ready for tabs.
- » Impressive built-in content style.
- » Gavick Suckerfish menu version, with 2 built-in options - Suckerfish menu and Mootools. 34 different styles mootools animation effects.
- » Speed menu animation option.
- » Optional IE6 Warning / Upgrade Users Notification.
- » Lightweight, modern and very fast-loading design.
- » Joomla 1.5 Native.
- » W3C XHTML 1.0 Transitional. W3C CSS Valid.
- » Fully compatible IE7+, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
- » Delivered with Special 50% discount coupon to get JomSocial Component.
- » Delivered with source Adobe .PSD files.
- » Delivered with “QuickStart Package” (without JomSocial integrated).

elvesocial - Overview files

Before we begin the explanation of the different files that compose the package, please have in consideration that the **JomSocial Component** is not included in the supply and for the power to use, you will have to acquire this application in <http://www.jomsocial.com/> taking advantage of the **special discount of \$50** through the coupon.

However, we made arrangements to include a quickstart version for fast installation to enjoy quickly the basic characteristics of our demo.

After having unloaded all of the files from our commercial section, let us see an brief content evaluation of the elvesocial package. Have in consideration that some of the used tools possess their respective support manuals, so we will provide an orientation guide for the respective installation and we will include also some screenshots about the configurations of the parameters of each used module. To get additional details on our extensions, please read the respective Support Manual.

[Here's a brief overview of the files available inside the "elvesocial" Template pack.](#)

You downloaded the following 2 compressed files:

» **gk_elvesocial_J!15.tgz** - This file is the template. For respective installation, please use Joomla installer.

» **gk_elvesocial_J!15_rest_files.zip** Important!!! Before running... please unpack the file first.

After having decompressed, you will find inside of "gk_elvesocial_J!15_rest_files" folder the following files:

» **_doc!!!** "folder"

Here you can find the support manual for this template. For the used extensions, get the manual of the respective extension files from our free download. This can be found inside of the respective package.

» **_quickstart!!!** "folder"

The ElveSocial comes along with a QuickStart installation, without JomSocial integrated.

For more information, please read the respective chapter.

» **Components** "folder"

Contains instructions to download Tabs Manager GK3 extension used on the ElveSocial template.

» **Modules** "folder"

Contains instructions to download News Show Pro GK1 module used on ElveSocial template.

» **Plugins** "folder"

Contains the new GK Typography plugin (**plg.gk_typography.zip**) for WYSIWYG editor use. For respective installation, please use Joomla Installer and then enable it on plugins manager.

» **Source** "folder"

Contains psd. source files for Photoshop Graphic Editor, ready to be changeable for customization of your website design.

Other files necessary and not available on package

As previously explained, to complete the necessary files for this project, you need to download our free extensions from our website. Get them on <http://tools.gavick.com> or to <http://www.gavick.com/downloads-area>

You will find the components and modules used on this template (since they are free, they are located on our free download section).

Here are the extensions used on demo template:

- » **Tabs Manager GK3 component** (IMPORTANT! Unpack the `tabsmanager_3_pack.zip` file.)
GK Tabs Manager GK3 component (`com_gk3_tabs_manager.zip`) - this is the Tabs Manager GK3 component and it's located inside of the component folder. (For installation, please use the Joomla Installer).
- GK Tab module** (`mod_gk_tab.zip`) - this is the module for frontend content display, exclusive for Tabs manager GK3 version. (For installation, please use the Joomla Installer).
- » **News Show Pro GK1 module** (IMPORTANT! Unpack the `news_show_pro_gk1_pack.zip` file.)
 Inside you will find the following files:
GK News Show Pro GK1 module (`mod_news_pro_gk1.zip`) - this is the module for news and articles display (For installation, please use the Joomla Installer).

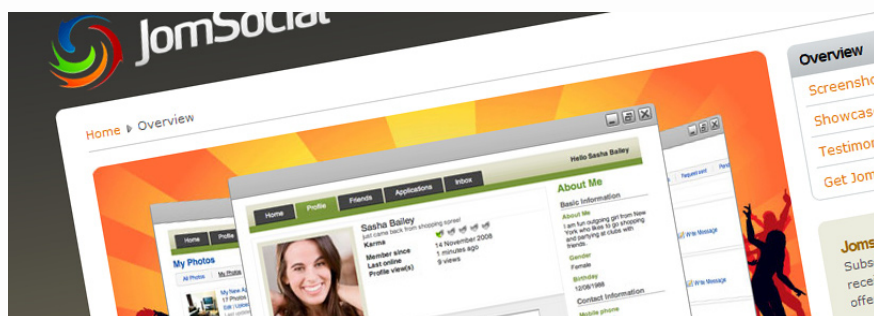

Notice!!!

The font(s) used on the source files are not provided with the Template package, because they may have copyrights reserved.

Also, the use of the images apply on the demo content is strictly prohibited.

ElveSocial Template was created and designed especially for the incorporation of the powerful and popular **JomSocial Component Network System for Joomla!1.5** from azrul.com team.

If you do not know this system, you can see the main features on the following website page from www.jomsocial.com.

Getting JomSocial with special conditions

As announced, as Member of the GavickPro Club you may purchase JomSocial with special conditions, benefits from a **discount of \$50 in any plan** (Standard, Professional and 5-Site License Editions).

To know the code that allows special conditions, please visit our presentation page of ElveSocial Template in our business section.

Then go to the www.jomsocial.com, select the respective edition you want to buy and click "Buy Now" button.

It will redirect you to the secured purchase page where you can insert your coupon code from Gavick MemberShip.

On this page, you need to insert the code on "Coupon Code (Optional)" field and then, press "Recalculate" button.

Automatically, the final amount payable will be adjusted and it will be the result of \$50 subtraction (or -37.18 in Euros).

ElveSocial QuickStart installation

For this project, we created a version of quick installation, however without the JomSocial integrated. With this type of installation, you can quickly get access to all settings of components and modules, with the exception of JomSocial Component. This means that there's no sql dump file for JomSocial content as we show in our demo.

We invite you to visit us regularly, because all Joomla!1.5 future upgrades may force us to upgrade all our templates and the respective extensions. So, keep in touch on update.gavick.com.

Strong Sugestion!!! Test Joomla on Local Server.

To get easy acquaint of ElveSocial template environment, by making some tests using local server (i.e. XAMPP - [click HERE to get it](#)) or others available for free in the internet. By installing this local servers, you be able to install, run and test all easily in your computer, like a normal website environment. This make all the difference and we guarantee you that will avoid wasting time by searching our support forum, when the answers are already available on the QuickStart version.

Well, let's start! If you follow this unique basic steps, your should have no problems at all.

Steps for QuickStart Installation:

Step 1) Unpack the compressed file `gk_elvesocial_J!15_rest_files.zip` and find inside the `_quickstart!!!` folder. Enter in it and you will find the `QUICKSTART_JUL2009.zip` file.

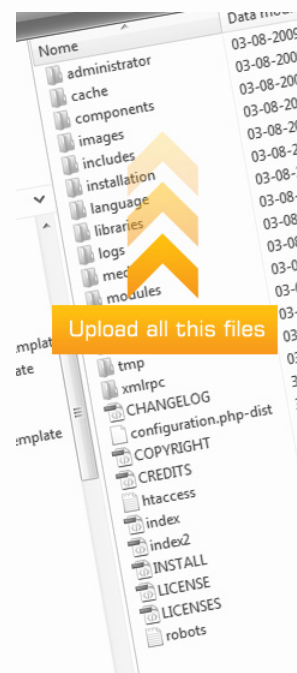

Step 2) Unpack the compressed file `QUICKSTART_JUL2009.zip` inside of the `_quickstart!!!` folder and upload all the content inside the `QUICKSTART_JUL2009` folder to your website directory. You will notice that this files are similar to a normal Joomla!1.5 package. That's because it is a normal joomla installation.

Step 3) Create a new database using [MyphpAdmin](#) that you should have available in your website cpanel.

Step 4) Make a normal Joomla J!1.5 installation using the upload files. **Notice!!!** You will see that it's not necessary at this time to set your Username and Password, because they are already provided by us.

Step 5) Like a normal joomla installation, you must delete or rename your "installation" folder in your website installation.

Step 6) After ending the installation, enter in the Administrator using Username "admin" and password "demo" (*Naturally, you can change this values after!!!*).

That's it! Easy, was not? Go to your new Joomla frontpage and see the website exactly as our demo. Now, you can start working on your own content and make guidance use of our tools configuration.

ElveSocial Quick Guide Step by Step Installation

For those who need to install the template manually and do not need further detail information, we prepare the following short task list for the ElveSocial installation.

Naturally, we will assume that you already have the latest Joomla! 1.5 website installed.

- » **Step 1** Install the **ElveSocial template** (*gk_elvesocial_J115.tgz*) using the Joomla Installer.
- » **Step 2** - Go to the Templates Manager and set "*gk_elvesocial*" template as default.
- » **Step 3** Using the Joomla Installer, install the **Tabs Manager Gk3** component (*com_gk3_tabs_manager.zip*).
- » **Step 4** Using the Joomla Installer, install the **GK Tabs** module (*mod_gk_tab.zip*).
- » **Step 5** Using the Joomla Installer, install the **GK News Show Pro GK1** module (*mod_news_pro_gk1.zip*).
- » **Step 6** Using the Joomla Installer, install **GK Typography** plugin (*plg.gk_typography.zip*) and enable it on Plugins Manager.
- » **Step 7 (JomSocial Purchase necessary)** Using the Joomla Installer, install **JomSocial Component and respective modules**.

For further informations, please see JomSocial Support Manual, provided by the respective JomSocial Team.

- » With all previous 7 steps done, your Joomla Website have all the necessary files installed. Further ahead, we provide orientation of the demo modules positions and their configurations.
- » For the demo modules positions, please see the screenshot on the next page!

Demo Modules Positions

The following screenshot contains a resume list of the modules used on the demo template and the respective positions. For your orientation, please check inside the DemoModulesConfigurations folder and you will find of Gavick and JomSocial modules used on demo.

ElveSocial template installation

After you have installed the Joomla! 1.5 version, we start to explain step by step how to install the components, modules and plugins for this template.

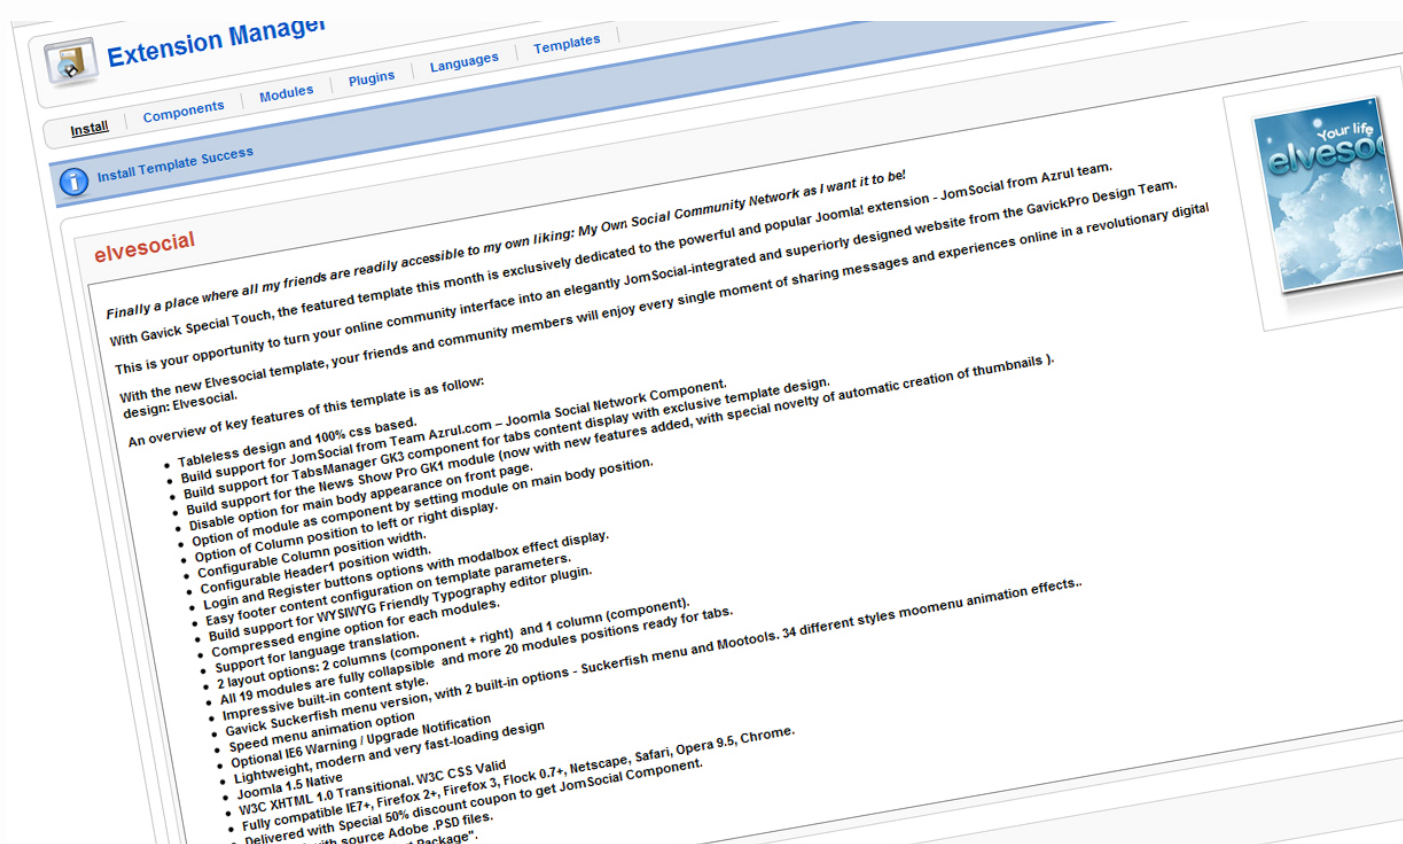

Navigate to your Joomla! Administrator and enter inside the administrative panel on your Joomla website.

From the top menu, select "Extensions > Install/Uninstall". Click the 'browse' button, select the template file (*gk_elvesocial_J!15.tgz*) and press 'Upload File & Install.'

Message will be displayed saying 'Install template Success'. and showing an overview of the template.

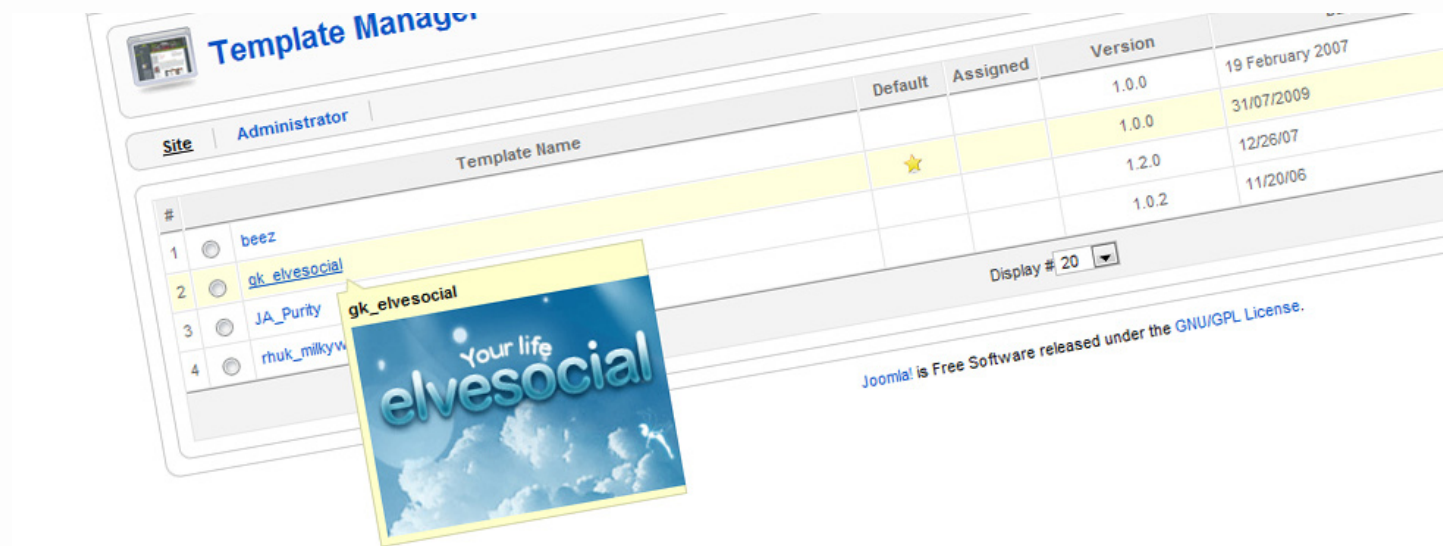

You now have the template installed, but you need to assign it as your default template of your website. To do this, navigate to "Extensions > Template Manager" and set it as default template.

With the template installed and assign, let's now see all the parameters available on the template for admin control.

ElveSocial - Template Parameters

ElveSocial comes with several parameters that you can configure as your needs. To access the template parameters, navigate to “[Extensions > Template Manage](#)” and select [gk_elvesocial](#) template on the page. Press “[edit](#)” option or just click on template link as you be able to see the following parameters table.

Basic template parameters:

Column position:

Set column position to right or left side.

Column position width:

Set width for column position in pixels (i.e. 300)

Header1 position width:

Set width of header1 module position - it must be value in px - i.e. 690 . Width of header2 module position will be adjusted automatically.

Show mainbody on frontpage:

Enable/disable the mainbody on frontage.

Interface parameters:

IE6 alert:

Given that this template does not have support for IE6, activating this option, the visitor of your page will automatically see internet information on IE6, advising him to upgrade his browser to IE7 or higher version.

Login button:

Enable this option if you want to show login button and login area.

Register button:

Enable this option if you want to show register button.

Logo as image:

If you want to have normal image instead of link with background - enable this option.

IMPORTANT: when you enable this option, style change won't change your logo till page refresh.

Footer parameters:

Footer content:

If you need to change frontend copyright's to your own, here you can easily change the footer content.

Menu parameters:

Menu type:

Select main menu type:

(Moomenu - Suckerfish menu - standard menu).

Menu name:

Name of menu to load on frontpage.

Menu speed:

Set speed of menu animation.

Menu animation:

Select type of menu animation transition between 34 different types.

Menu width animation:

Use width animation in menu.

Menu height animation:

Use height animation in menu.

Menu opacity animation:

Use opacity animation in menu.

Parameters

The parameter file 'templates/gk_elvesocial/params.ini' is **writable!**

| | |
|----------------------------|----------|
| Basic template parameters | |
| Column position | Right |
| Column position width | 300 |
| Header 1 position width | 690 |
| Show mainbody on frontpage | Disabled |
| Interface parameters | |
| IE6 alert | Enabled |
| Login button | Enabled |
| Register button | Enabled |
| Logo as image | Enabled |
| Style switcher | Enabled |
| Footer parameters | |
| Footer content | |
| Menu parameters | |
| Menu type | MooMenu |
| Menu name | mainmenu |
| Menu speed | 180 |
| Menu animation | linear |
| Menu width animation | Enabled |
| Menu height animation | Enabled |
| Menu opacity animation | Enabled |

Tabs Manager GK3 Component Installation

Tabs Manager GK3 is an amazing tool to display content on tabs, like articles, modules or even custom XHTML content. You need to download this component from our free download section on <http://www.gavick.com/downloads-area.html>.

Please, before installation unpack this file first.

Using the Joomla Installer, get `com_gk3_tabs_manager.zip` file and select “upload and install”.

A message will appear saying ‘Upload Component - Success’ and it will show you an overview of the component.

Warning! You cannot link directly the component using joomla menu for frontpage display.

GK Tabs GK1 Module Installation

For front end display of the Tabs Manager GK3 groups content, please use the Gavick Tabs GK1 Module.

Using the Joomla Installer, search for the `mod_gk_tab.zip` and select “upload and install”. A message will appear saying ‘Install Module Success’. You can now see this module available on “Extensions > Module Manager” list.

GK Tabs GK1 Module Configuration

If you need to check our module configuration used on the demo template, please open the Demo Modules Configurations folder available on the package and inside of `GK_Tabs_GK1_module` folder you will find an screenshot for your consultation.

IMPORTANT!!! - In case you find problems with module style (i.e. - strange border around module), you can disable module CSS in advanced parameters. By doing this, it should solve your problem.

For further detail information, please read the Tabs Manager GK3 HelpFile provided in the `_doc!` folder package.

News Show Pro GK1 Module Installation

News Show Pro GK1 extension is one of the most popular extension on Joomla Community. For many users, perhaps the best ever made. We like to think that the best is yet to come.

With its powerful capabilities and presentation of articles and news content, News Show Pro GK1 offers you an amazing ways to display your website content in the most stylish and highest level of professional presentation.

Once again, you need to download this free module from our tools download section on <http://www.gavick.com/downloads-area.html> and then unpack the file.

To install, use the Joomla Installer, search for the `mod_news_pro_gk1.zip` and select “upload and install”.

A message will appear saying ‘Upload module - Success’ and it will show you an overview of the module.

News Show Pro GK1 Module Configuration

To avoid repetition of the instructions included in the Support Manual of this tool, please see the respective files available on the extension package. There you will get orientation the administrate the different parameters available on News Show Pro GK1.

If you need to check our modules configurations used on the demo template, please open the **Demo Modules Configurations** folder available on the package and inside of `GK_News_Show_Pro_module` folder you will find screenshots of all the modules used and identified with the respective module ID for your consultation.

IMPORTANT!!! - In case you find problems with module style (i.e. - strange border around module), you can disable module CSS in advanced parameters. By doing this, it should solve your problem.

For further detail information, please read the News Show Pro GK1 HelpFile provided in the `_doc!` folder package.

GK typography plugin overview

We implemented a new feature extremely useful for the use of typography, specially created for the template. Like in all Joomla! templates, characterization of the text style is added to enrich even more the respective content. However, we may say that some Users have not been motivated to use this potential, perhaps because this information was not easily available.

So, in order to promote and facilitate the use of the typography, we added a special plugin that will allow Users to set easily any typography style in text.

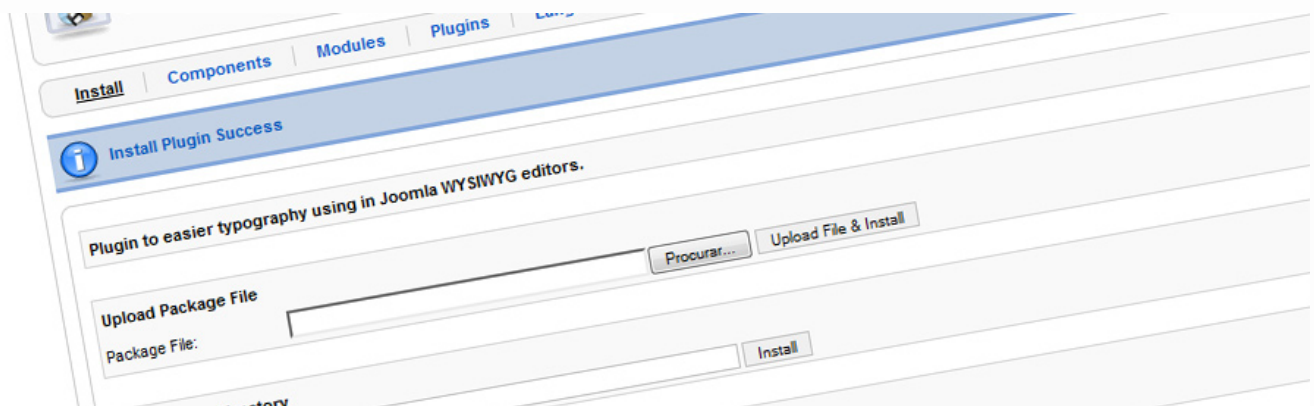

This new feature will be implemented in all our future templates and also on our old templates from 2008 to 2009.

GK typography plugin installation

Go to “[Extensions > Install/Uninstall](#)” and select the [plg.gk_typography.zip](#) file, available inside the plugins folder on the [gk_elvesocial_J!15_rest_files](#) package. Upload file and install.

A message will appear saying “[Install Plugin Success](#)” and it will show you an small description of the plugin.

Next, you will need to enable it on the Plugin Manager of your Joomla.

So, navigate “[Extensions > Plugin Manager](#)” and find the [Button - GK Typography](#) Plugin and enable it.

GK typography plugin How to Use

It's very easy to work with, as you be able to see.

So, let's start by creating a new article. Go to "[Content > Articles Manager](#)" and press new button. Now you will see the normal WYSIWYG joomla editor and on the bar above you will find the **GK Typography button**.

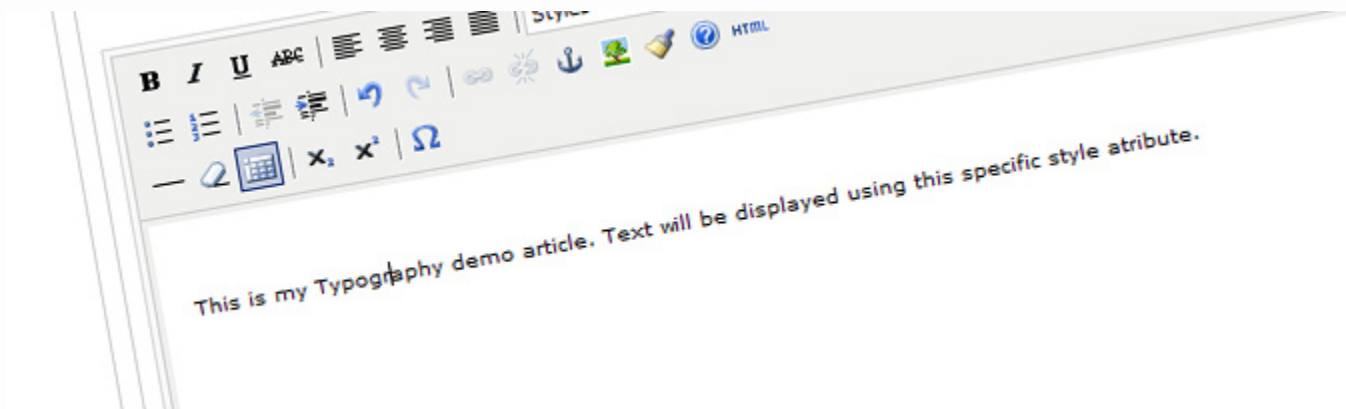

Click on it and a modalbox will popup with all the Typography added to this template. Scroll down top select the desired one, and press the respective text style on the left column.

For example, i will select the “pre” style. So, i just press on it and immediatly text will be added on the text area.

Now, i just need to replace the existing text with my own and save.

So, let's see the result on frontpage.

Nice, right?

Easy and friendly interface, this will be very important to help you to create stunning articles styles.

This page presents most of typographical aspects of elvesocial template. Make your readers happy with great Typography and User Experience!

Below are samples of definition lists

`<dl class="def1"><dt>Here goes the word you're about to define</dt><dd>Here goes definition</dd></dl>`

Butter

it is a dairy product made by churning fresh or fermented cream or milk. It is generally used as a spread and a condiment, as well as in cooking applications such as baking, sauce making, and frying. Butter consists of butterfat, water and milk proteins.

Dairy milk

is an opaque white liquid produced by the mammary glands of mammals (including monotremes). It provides the primary source of nutrition for newborn mammals before they are able to digest other types of food.

<dl class="def2"><dt>Here goes the word you're about to define</dt><dd>Here goes definition</dd></dl>

Component full width page

ElveSocial template supports full width of the page to view galleries, forums or other component that needs to occupy the full width. To ensure this result, be sure not to publish any modules in right column, assigned to the link component.

Module as Component

This is a new feature that we implement in the newest templates. Allows you to display any Module as Component (on component mainbody position).

You just need to enable the module to “mainbody” module position and assign it for example to a wrapper menu link without any content.

It will display full width or not, depending on the module width configuration.

So, if you are one of those who ask us if there a possibility to display a module as component, here's you answer.

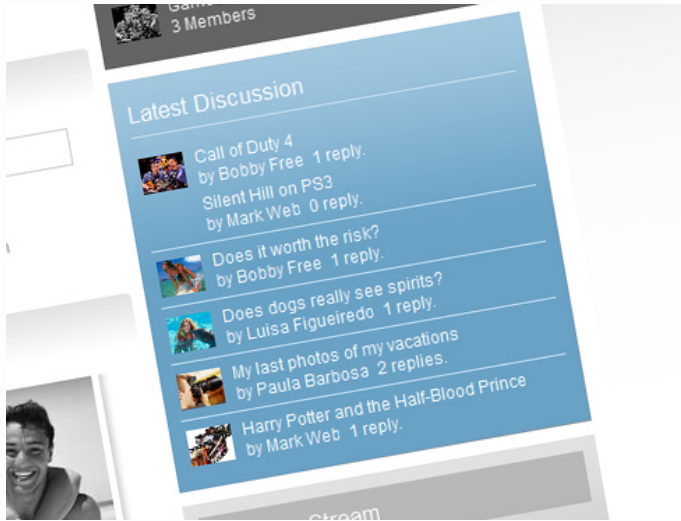

If you have any doubt of this feature, please ask us for support in GavickPro Oficial Forum.

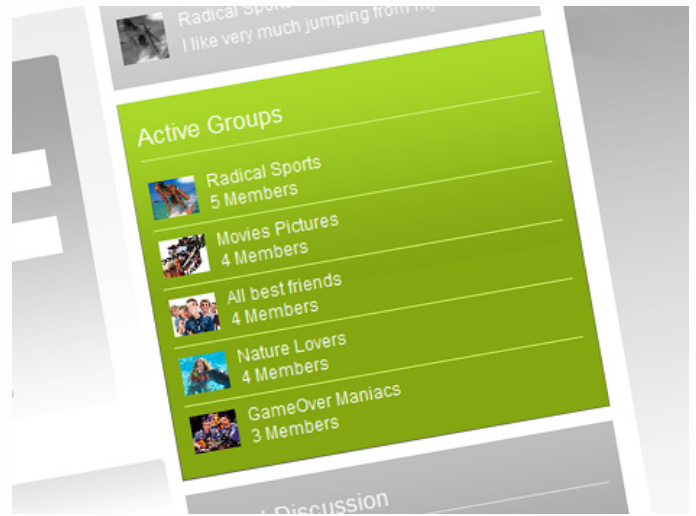

Modules Variations

ElveSocial template comes with embed style modules positions and with the following modules suffix.

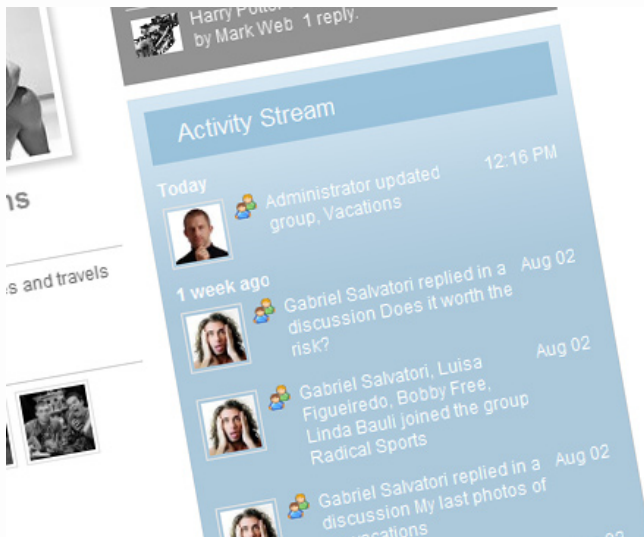

Here are some examples of modules suffix:

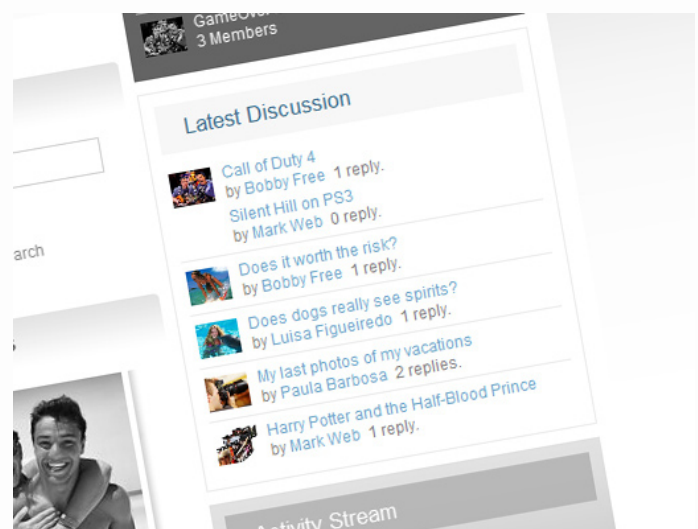

Using “_blue” module suffix

Using “_green” module suffix

Using default module suffix

Using “_white” module suffix

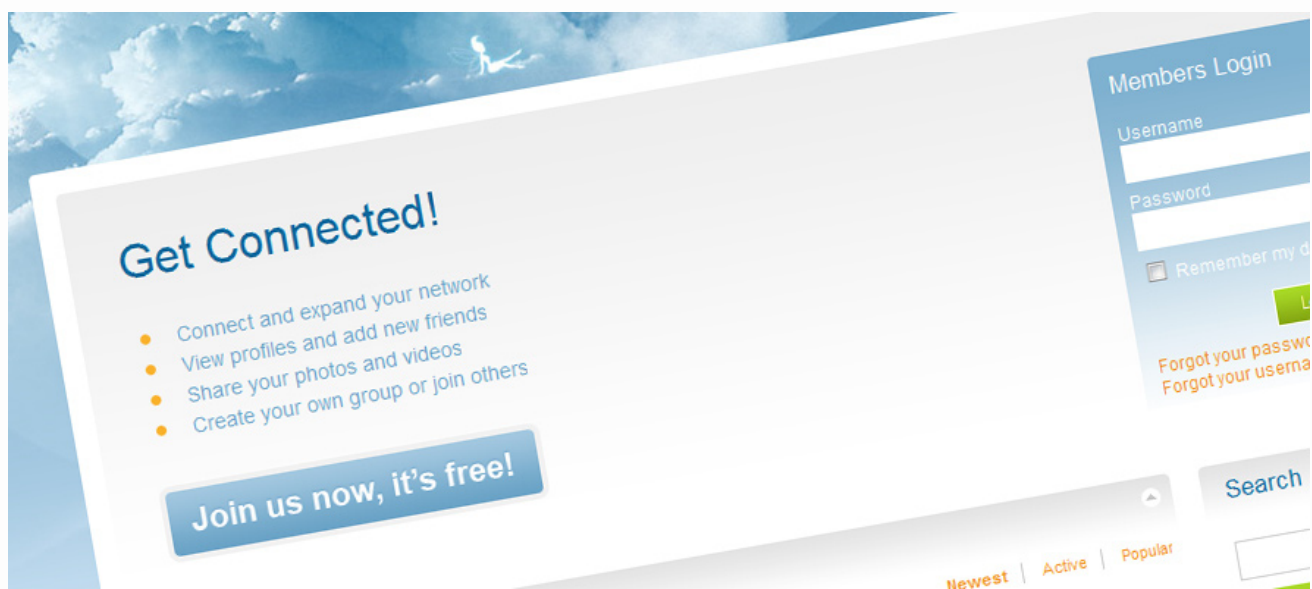

Also, there's specific module suffix for menu - “_menu” and module with mainly text content - “_text”.

Template Modules Style

ElveSocial comes with special style for **Tabs Manager GK3** using tabs module, when publish on header1 and header2 modules position. Here's a screenshot of the example used on demo frontpage.

Default style for **JomSocial** main page display.

Here are some recommendations that might help you.

Are you new in Joomla?

If you are new in Joomla, we strongly recommend that you perform some tests and experiences to fit into this excellent CMS (Content Management System), and visit the official support forum of www.joomla.org for any problem direct relationship. GavickPro Studio is not responsible for Joomla, neither gives respective support. Nevertheless, if possible, we will be happy to help you in our support forum.

Building a new Website ?

If you are building a new website and if you like our demo, we strongly recommend the use of QuickStart version, and from this start change it with your own content and easily make any necessary configuration adjustments.

Get quick acquaint with ElveSocial template

In all cases, if you are a new or already experience user, we always recommend experimental version, using free popular local server like XAMPP or WAMP (you can find easily information on internet about this excellent tools for website development) or if you prefer, an online test installation. This way, you will be able to fit more fast and easily in some tools configurations, modules positions and other particular details that you need to know.

You already have a website and want to use this template ?

If you choose to install this template in an already existing website, make sure that you have the latest version of Joomla (present version - J!1.5.14). If not, please upgrade to insure compatibility with our template and extensions. Naturally, if this is your case, you must install all files individual, from template to components, modules and plugins. Nevertheless, please remember that the QuickStart version is still important ally for orientation. Just remember the previous recommendations.

Do you have some problems with our extension?

Some usual problems reported on our support forum are script conflict from 3th party extensions. If you know Joomla enough, you know there's an huge amount of solutions and extensions available for free or commercial from other teams or developers. Naturally, you will search others extensions to complete some particular functionality to fulfill your website needs. But understand that we are responsible only for our template and extensions, and we cannot guarantee that all 3th party tools will work perfectly with our project. So, it's in your hands to choose those extensions on Joomla Community. Nevertheless, ask for support in our forum, and if possible we will try to provide your solution.

Another usual problem identified in our forum is related with permissions on files and directory. Some tools need specific files to have rewrite or read permissions, so you might find some problems if you don't have this permissions set. Notice that we cannot control your server security configurations, but we can provide directions were you must change this permissions. If you are unable to change it, we advice you to contact your host provider.

Keep always updated!

We strongly recommend regular visits to update.gavick.com, where you can find the latest updates of our templates, components, plugins or modules. If you have any problem, please be sure if the solution is not already available.

This way will avoid waste time, searching or asking for solutions in our forum support.

Need some small Style customization adjustment?

You can always request support to our Moderators or Developers, but you need to take in mind that this is customization and not regular support service.

In future, GavickPro might provide personal customization services and installation support, but it's not yet available as standard service. The Developer MemberShip is excluded, since this subscription already have this type of support, if needed. Nevertheless, we will always try to help you.

If you have some experience in CSS styling, we strongly recommend the use one of the most powerful tool for WebDesigners, available for free in [FireFox addons](#) - The **FireBug** - without any doubt, you can't find most powerful ally if you are building a website.

What is the better way for me to report my problem in the support forum?

If you need help on some issue, please report on our forum in the most objective way, be polite and preference in english language.

Always identify your URL for faster support, because in most cases our support team needs to see the problem.

Need to contact Us?

Besides our official forum support, you can also contact us by Skype. Please check our contact page and we will reply as soon as posible.
