Figure 3: View extensions

❖ In the next page, there are downloadable packages

- BJ imagine slider 2 PRO contains instalation file for Joomla 1.5
- BJ_Pro_Terms_and_conditions contains and terms and conditions document.
- BJ Image Slider 2 PRO for Joomla 1.6 contains installation file for Joomla 1.6

II, HOW TO INSTALL

1) Unzip all the .zip package.

2) Find the installation file inside.

3) Login Joomla as Administrator user.

a. Extensions → Install/Uninstall.

4) Press **“Choose file”** button and find you downloaded file com_bjimageslider_x.x.x.zip on your computer.

5) Install component by pressing **“Upload File & Install”** button.

- 6) Install module by Press “**Choose file**” button and find you downloaded file mod_bjimageslider_x.x.x.zip on your computer.

III. CONFIGURATION

BJ ImageSlider, BJ ImageSlider 2 and BJ PhotoGallery modules work with BJ ImageSlider Component. You need the component to manage all the images. Thus, it is needed to get familiar with the component first.

1, BJ ImageSlider 2 component

a) Configuration

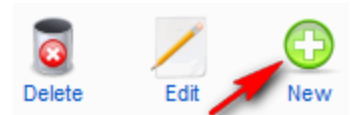

Configuration determine the size of your slideshow, including main images and their thumbnails. For example, you want your slideshow to have the main image with the size of 650px * 350px, and thumbnail images have the size of 52px * 35px

Config your slide show in BJ ImageSlider component's configuration section.

- ❖ **Components → BJ ImageSlider → Configuration → enter Image and Thumbnail width and Height → Save or Apply**

b) Manage categories

- ❖ **Components → BJ ImageSlider → Manage Categories**

- ❖ Create new category

New → Name → Description (if needed)

Add a category

Category Details

Category Name:

Published: ☐ No ☒ Yes

Description:

B I U ABC Styles Paragraph

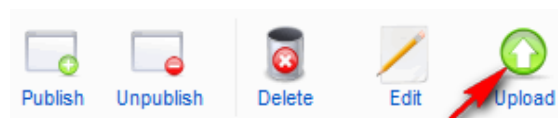

BJ Image Slider

Figure 4: Creating new category window

c) Manage images

- Upload images

Components → BJ ImageSlider → Manage Images → Upload

- ❖ Choose category to place new image in. Enter Name and Description for the image.

- ❖ Enter CSS class for this image. Note that this CSS is pre-defined in BJ ImageSlider module, or you can use your own definition. This CSS class is used to style image's caption.
- ❖ Choose images to upload as main image and thumbnail image → Upload
- ❖ Note that all published images in category will be shown in BJ ImageSlider.

Figure 5: Uploading photos window

2, BJ ImageSlider 2 Free module

a) How to get there

Extentions → Module manager → Choose BJ ImageSlider 2 Free

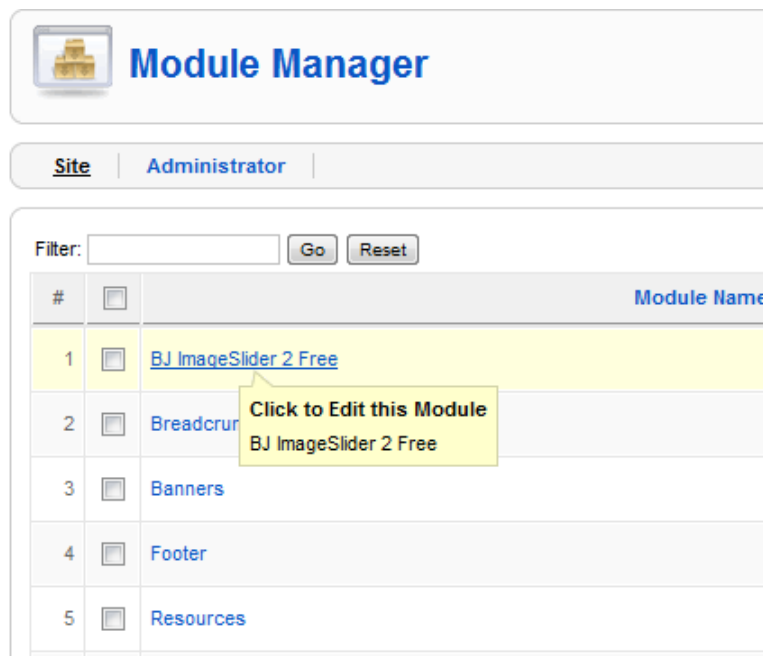

Figure 6: Module manager window

b) Free version Parameters

Parameters

▼ **Module Parameters**

Module Class Suffix	<input type="text"/>
Category Id	<input type="text" value="1"/>
<hr/>	
Slide Show Width	<input type="text" value="960"/>
Slide Show Height	<input type="text" value="300"/>
Gallery border width	<input type="text" value="1"/>
Delay time	<input type="text" value="4000"/>
Duration time	<input type="text" value="750"/>
Filmstrip Size	<input type="text" value="5"/>
Navigation button margin	<input type="text" value="8"/>
Caption Thickness	<input type="text" value="300"/>
Caption Opacity	<input type="text" value="0.7"/>
Slideshow background	<input type="text" value="333333"/>
Slideshow Text Panel background	<input type="text" value="333333"/>

Figure 7: Parameters window

- ❖ **Category ID:** ID of the photo category that you want to show. You can find the ID in category category manager

Category Manager

#	Category Name	Published	Reorder	Order	Category ID
1	Sample category	✓		999999	1

Display # 20

Figure 12: Parameter window

- ❖ **Show caption:** Description of picture is shown or not
- ❖ **Show next item title:** Title of picture is shown or not when the mouse is over the navigation button.

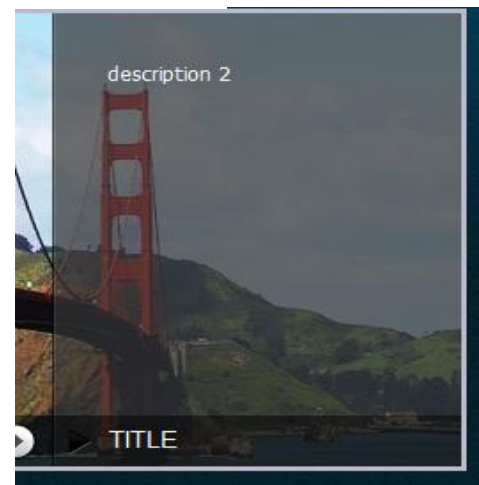

Figure 13: Caption and title position in slideshow

- ❖ ***Pause on Hover:*** Whether to pause the animation when mouse is on panel.
- ❖ ***Show play/pause button:*** Whether to show the controller button when the mouse over panel
- ❖ ***Show panel gradient:*** just enable this parameter in PRO version
- ❖ ***Autohide filmstrip:***
 - If yes- the filmstrip will disappear when mouse out of panel and appear when mouse over panel.
 - If no- the filmstrip is fixed.
- ❖ ***Auto start Slide show:*** Whether to start the slide show when open page. If no- the first picture is shown. Navigation buttons are used to move to the next picture.
- ❖ ***Show filmstrip:*** Whether to show the filmstrip containing the navigation buttons or not.
- ❖ ***Filmstrip position:*** Default in the bottom. More positions are provided in PRO version.
- ❖ ***Caption position:*** Default in the right hand side. More positions are provided in PRO version.
- ❖ ***Image and Text transition effect:*** Default blur. More options are provided in PRO version.
- ❖ ***Panel on click:*** Default do nothing. More options are provided in PRO version.
- ❖ ***Transition easing method:*** Default swing. More options are provided in PRO version.
- ❖ ***Need JQuery?:*** a javascript used by the module. If you are going to use BJ Image Slider 2 with BJ Venus template, this parameter should be turned off

Figure 14: Pause button

(because BJ Venus has loaded this library by default). Otherwise, turn it on when using with non-Jquery supported template.

3, BJ ImageSlider 2 PRO module

a) How to get there

Extentions → Module manager → Choose BJ ImageSlider PRO

b) PRO version Parameters

BJ ImageSlider 2 PRO/DEV has 2 styles: **Default** (as can be seen on BJ Venus [demo page](#)) and **Venus 2** (as can be seen on BJ Venus 2 [demo page](#)). Thus, the parameters are divided in 3 main groups: common parameters affect both styles; default parameters affect **Default style** only; and venus 2 parameters affect **Venus 2 style** only.

- ❖ **Slider style:** BJ ImageSlider 2 PRO user can choose between Slider style Venus 1 (default) and Venus 2

Slider style	<input checked="" type="radio"/> Default	<input type="radio"/> Venus 2
--------------	--	-------------------------------

➤ Common Parameter

(Common) SlideShow Width	<input type="text" value="960"/>
(Common) Slide Show Height	<input type="text" value="300"/>
(Common) Gallery border width	<input type="text" value="1"/>
(Common) Delay time	<input type="text" value="4000"/>
(Common) Duration time	<input type="text" value="750"/>
(Common) Slideshow background	<input type="text" value="333333"/>
(Common) Slideshow Text Panel background	<input type="text" value="333333"/>
(Common) Caption Width	<input type="text" value="300"/>
(Common) Caption Opacity	<input type="text" value="0.7"/>
(Common) Show caption	<input type="radio"/> No <input checked="" type="radio"/> Yes
(Common) Show caption title	<input type="radio"/> No <input checked="" type="radio"/> Yes
(Common) Show panel gradient	<input type="radio"/> No <input checked="" type="radio"/> Yes
(Common) Auto start slideshow	<input checked="" type="radio"/> Yes <input type="radio"/> No
(Common) Pause on Hover	<input checked="" type="radio"/> No <input type="radio"/> Yes

Figure 15: Common Parameters

- ❖ **Slide show width/height:** Width and height of SlideShow in pixel
- ❖ **Gallery border width:** Width of border in pixel
- ❖ **Delay time:** Length of time that one picture will be shown in millisecond.
- ❖ **Duration time:** Length of time that the transformation between pictures happens in millisecond.
- ❖ **Filmstrip size:** number of visible navigation button.
- ❖ **Navigation button margin:** distance between navigation buttons in pixel
- ❖ **Caption thickness:** space for caption

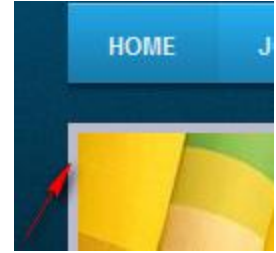

Figure 16: Gallery border width

Figure 17: Filmstrip size=4

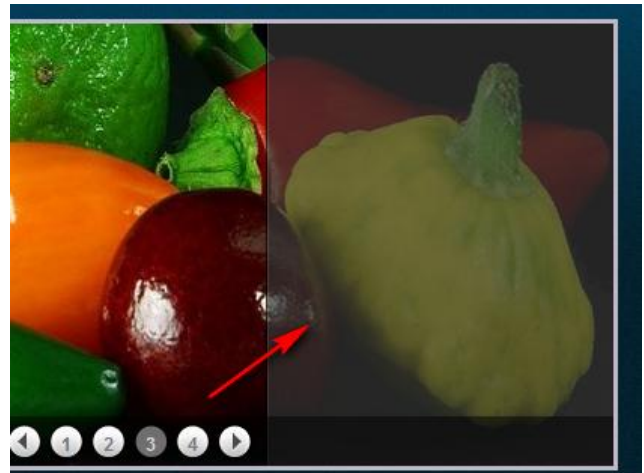

Figure 18: Caption thickness

- ❖ **Caption opacity:** (0-1) 0-total transparent. 1-total opaque
- ❖ **Slideshow background and text panel background:** choose color in hexa color for background.
- ❖ **Show caption and caption title:** Description of picture and name of picture is shown or not

❖ **Show panel gradient:**

Figure 19. Panel without gradient

Figure 20. Panel with gradient

- ❖ **Auto start Slide show:** Whether to start the slide show when open page. If no- the first picture is shown. Navigation buttons are used to move to the next picture.
- ❖ **Pause on Hover:** Whether to pause the animation when mouse is on panel.

➤ Default Parameter

- ❖ **Filmstrip size:** Number of navigation button in filmstrip.
- ❖ **Navigation button margin:** distance between navigation buttons in pixel
- ❖ **Show next item title:** Title of picture is shown or not when the mouse is over the navigation button.
- ❖ **Show play/pause button:** Whether to show the controller button when the mouse over panel
- ❖ **Autohide filmstrip:** If yes- the filmstrip will disappear when mouse out of panel and appear when mouse over panel.

(Default Style) Filmstrip Size	<input type="text" value="5"/>
(Default Style) Navigation button margin	<input type="text" value="8"/>
(Default Style) Show Next Item Title	<input type="radio"/> No <input checked="" type="radio"/> Yes
(Default Style) Show Play/Pause button	<input type="radio"/> No <input checked="" type="radio"/> Yes
(Default Style) Auto hide filmstrip	<input checked="" type="radio"/> No <input type="radio"/> Yes
(Default Style) Show caption outside	<input checked="" type="radio"/> No <input type="radio"/> Yes
(Default Style) Show FilmStrip	<input type="radio"/> No <input checked="" type="radio"/> Yes
(Default Style) FilmStrip Position	<input type="radio"/> Top <input checked="" type="radio"/> Bottom
(Default Style) Caption Position	<input checked="" type="radio"/> Right <input type="radio"/> Left

Figure 21: Default Parameters

If no- the filmstrip is fixed

- ❖ **Show caption outside:** whether to let to caption go out side panel
- ❖ **Show filmstrip:** Whether to show the filmstrip containing the navigation buttons or not
- ❖ **Filmstrip position:** The position of Filmstrip: Top or Bottom
- ❖ **Caption position:** The position of Caption: Left or Right

➤ Venus 2 Parameter

(Venus 2) Caption Height	100
(Venus 2) Caption Top margin	100
(Venus 2) Caption Left margin	0

Figure 22: Venus 2 Parameters

- ❖ **Caption Height:** Height of caption in pixel
- ❖ **Caption Top margin:** Space from top of caption to top of panel
- ❖ **Caption Left margin:** Space from the left margin of caption to left margin of panel.

➤ Effect

Image Transition effect	blur
Number of slices	20
Text Transition effect	blur
Panel On Click	Do nothing
Transition Easing Method	swing
Need JQuery?	<input checked="" type="radio"/> No <input type="radio"/> Yes

Figure 23: Effect Parameters

- ❖ **Image Transition effect:** PRO version provide a lot of effect applied for imagine, text transition, Panel on click, transition easing method...
- ❖ **Need JQuery?** a javascript used by the module. If you are going to use BJ Image Slider 2 with BJ Venus template, this parameter should be turned off

(because BJ Venus has loaded this library by default). Otherwise, turn it on when using with non-Jquery supported template.

4, BJ ImageSlider PRO/DEV vs. BJ ImageSlider FREE
