

Paypal Payment Plugin

Introduction

The Paypal Plugin for K2 Store enables you to receive payments via Paypal Payment Gateway. Getting a paypal account is very easy. Look at more about paypal here www.paypal.com

Installation Instructions

1. Use the Joomla installer to install the plugin.
2. In the backend, go to Extensions->Plugin Manager and open the Paypal Payments plugin.
3. Enable the plugin
4. Enter the parameters (read the explanation about each parameter given below)
5. Save and close it.

Now you can see the Paypal Payments as an option during the Check out process.

Params

Paypal Email Address: This is your original paypal email/merchant email address, which you have used in Paypal.

Use SSL to post back to Paypal?: If you are using SSL certificate (https), enable this. If you dont know what SSL is better leave it as No

Use Paypal Sandbox: Paypal offers a testing suite called Sandbox. Before going live, it is advised to test your store using the Paypal's sandbox feature. Read more about Paypal Sandbox at developer.paypal.com. NOTE: To receive payments (except during testing), you dont have to enable this. IN LIVE SITE, THIS SHOULD BE SET TO NO.

Paypal Sandbox Merchant Email: Your paypal sandbox email.

Paypal Sandbox Customer Email (optional): You paypal sandbox customer email.

Paypal Thanks Msg K2 Item ID: You can create a K2 Item to say thanks to the users, who purchased in your online store. Enter the ID of the K2 Item here. This will show, when users return from the paypal.
