Fracture Template User Guide

A. Fracture Template Overview
Please check the complete overview of Fracture template including the Features and Screenshots, link to the demo site, download area, and the support forum.
1. Fracture Template Announcement
2. Fracture Template Overview

B. Fracture RocketLauncher
If you are new to Joomla, we have RocketLauncher packages which are provided as an additional option to the template. RocketLauncher is a customized Joomla install, that installs a replica of the demo onto your site - inclusive of sample data, content, extensions, the template and sample images.
- **RocketLauncher must be installed as new, and not over an existing Joomla install.**
- **We also recommend you to install RocketLauncher on your localhost and use it as a reference.**
Note: All sample content images will be replaced with blank versions in the RocketLauncher version.

How to Install Fracture RocketLauncher
1. Upload
- Download the RocketLauncher (rt_fracture-rocketlauncher.zip)
- Unzip the rt_fracture-rocketlauncher.zip
- Upload the files to your server
Note: You can upload all the files via FTP, or use cPanel or SSH to upload the zip and unzip directly onto the server. Enquire with your hosting provider.
2. Installation
- Go to http://www.yoursite.com/rt_fracture-rocketlauncher
- Follow the installation instruction which is basically same with regular Joomla installation
- Ensure you click **Install Sample Data** button during the installation, otherwise your site will be blank
- Remember your administrator "username" and "password" you set during the installation
- Delete the **/installation** directory on your server

C. Fracture Template Installation
Please go to Fracture Download Area and download the necessary files required for the template to function:
- Template (Standalone) rt_fracture.zip
Note: If Gantry Library has been installed at /components/com_gantry, please install the Standalone Template.
- Template (Bundle) rt_fracture-bundle.zip
Note: The Bundle Template is only necessary if the Gantry Library is not installed at /components/com_gantry.
- RokNavMenu rt_fracture-extensions.zip
Note: Unzip the rt_fracture-extensions.zip package and find mod_roknavmenu.zip.

Fracture Template Support

A. Search

Most questions might have been answered several times on this forum, in whatever format that maybe. So we highly recommend you to use the "Search" function **here** before raising your questions in forum.

B. Top Tips for Support

Please make sure you follow our Support Guidelines **here**.

C. Post in the Appropriate Forum

You will most likely find the answer to your template question on the forum but if you not, please post in **Fracture Forum** so our moderators can review and reply to your thread. Remember to follow the **Top Tips for Support** before posting your questions.

Note: Please never send PM to moderators unless requested. We check forum regularly but not our PM Inbox.
