Menu Options

Please ensure you are using the latest version of RokNavMenu, available [here](#).

Menu Types

- *Fusion Menu*
  A Mootools enhanced CSS dropdown menu, with multi-columns, icons and more.
- *SplitMenu*
  A static two level menu placing parents items in the header area, and child items in the sidebar.
- *No Menu*
  An option to disable the menu, allowing for normal module use of the **navigation** position.

Fusion is inoperable in **IE6**, and will automatically switch to **Suckerfish**.

Configuration

Go to **Extensions → Template Manager → rt_omnicron_j15 → Menu Control** to find all the parameters for Fusion Menu and Splitmenu, such as transitions, duration and sublevel position.

Descriptions of each template parameter can be seen when you mouseover the label of each option.

Fusion Menu with Mega Menu

Fusion Menu is a menu theme of the **RokNavMenu** extension, the addon that drives all RocketTheme template menus. It is primarily a javascript enhanced CSS dropdown menu, that combines standard suckerfish type functionality with animations, transitions and other advanced effects provided by Mootools.

NOTE: The latest version of [RokNavMenu](#) is required, in order for Fusion to operate.

Latest Features

- Triple / Quad Column Mode
- Column Menu Grouping
- Column Width Control
- Load Modules inside Dropdowns
- Load Module Positions inside Dropdowns

Recurring Features

Below is a list of the standard, recurring features of the Fusion Menu:

- Single Column Mode
- Dual Column Mode

- Menu Item Subtext
- Menu Item Icons
- Javascript Controls

Splitmenu

A static menu system that displays submenu items outside of the main horizontal menu and the 2nd level items in the Sidebar.

Template Configuration: Splitmenu

Go to **Extensions** → **Template Manager** → **rt_omnicron_j15** → **Menu** Set **Menu Control** to **Type** : **Split-Menu**, to load all the Splitmenu parameters.

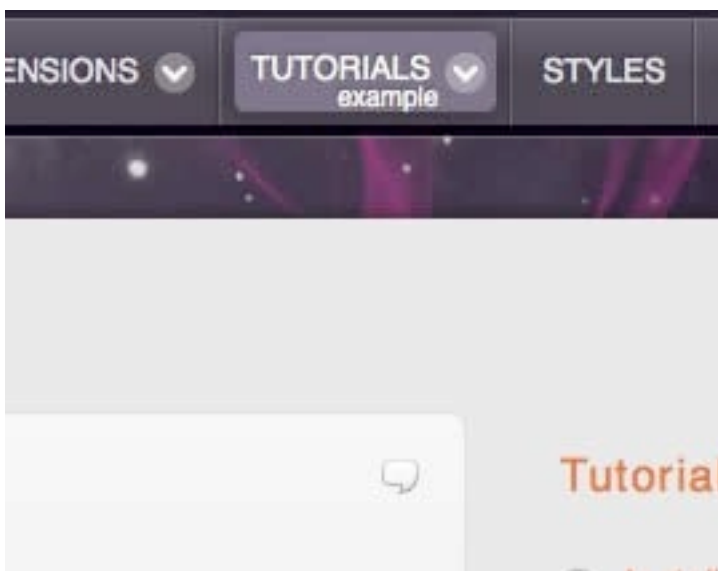

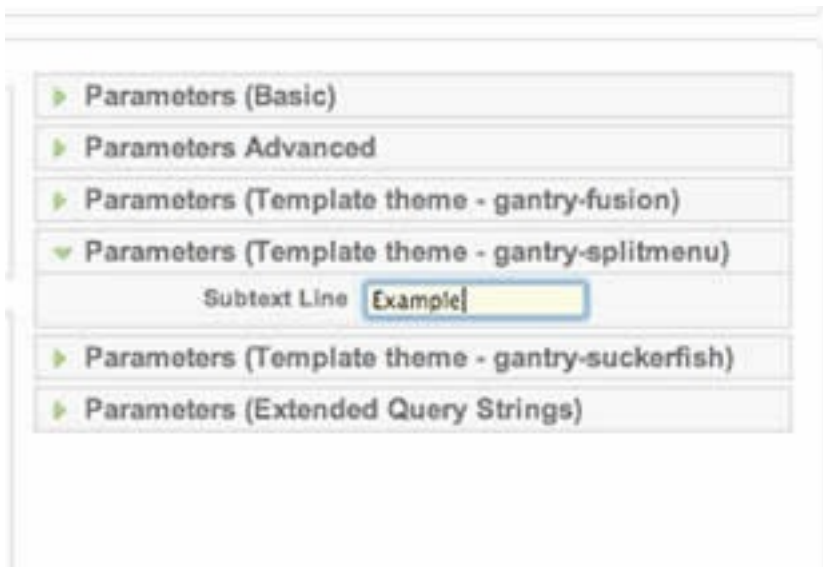

Menu Item Parameters: Subtext

Subtext Line is the option that allows you to insert additional text to the **Menu Item Title**. There is separate styling for this, making it useful for adding brief descriptions to menu items.

Code Modification: Remove the Menu in the Title

Open **/templates/rt_omnicron_j15/html/modules.php** and change:

```php
<?php echo $menu_title_item->name.' '.JText::_('Menu'); ?>
```

To

```php
<?php echo $menu_title_item->name; ?>
```

How to create Child / Sublevel menu items in Joomla

Go to **Admin → Menu → *A Menu* → *A Menu Item* → Select a *Parent Item***, and it will appear as a child of it.
