RocketLauncher

Note: All sample content images will be replaced with blank versions in the RocketLauncher version.

RocketLauncher is a customized **Joomla** install, that installs a **replica** of the **demo** onto your site - inclusive of sample data, content, extensions, the template and sample images.

Note: We always recommend installing a RocketLauncher first to trial and understand the template more efficiently.

It must be installed as **new**, and **not** over an existing Joomla install.

Step 1 - Upload

- **Download** the RocketLauncher *(rt_omnicron_j15-rocketlauncher.zip)*
- **Unzip** to reveal the *rt_omnicron_j15-rocketlauncher* folder
- **Upload**

Note: You can upload all the files via FTP, or use cPanel or SSH to upload the zip and unzip directly onto the server. Enquire with your hosting provider.

Step 2 - Installation

- Go to www.yoursite.com/rt_omnicron_j15-rocketlauncher
- Follow the Installation instructions
- Ensure you click *Install Sample Data* during installation
- Delete the **/installation** directory on your server

Ensure you click *Install Sample Data* during installation, otherwise your site will be blank.
