

Module Positions

There are 70 module positions. If no module is published to a position, it will not appear, collapsing the entire area.

Non-Standard Elements

There are **non-standard** elements that are injected into the template grid structure when enabled via the **template parameter**, such as the **logo** into **header-a**. These features **stack** vertically with any modules published to that position.

You can change the positions of these elements at **Extensions** → **Template Manager** → **rt_tachyon_j15**

Layout Control

Control all modules positions with Gantry, in terms of widths within the module row, and left/right/middle placement for the mainbody/sidebar area.

Preview

View all module positions live by appending **?tp=1** or **&tp=1** to the end of your URL such as <http://yoursite.com/index.php?tp=1>.
